CAREER OBJECTIVE

Motivated pre-final year B.Tech student in Artificial Intelligence and Data Science seeking an internship in AI/ML. Interested in applying skills in machine learning, deep learning, and computer vision, with hands-on experience in real-time model development and deployment, to build impactful real-world solutions.

EDUCATION

B.Tech in Artificial intelligence and data science, Psna college of engineering and technology (GPA: 9.19) 2023 — Present
Dindigul, India

CERTIFICATIONS

• Microsoft Excel , Coursera Project Network	Jan '25
Prompt Engineering, Generative AI Studio , Simplilearn SkillUp	Sep '25
Machine Learning: Build-Train-Deploy , PSNACET	Feb '26
AWS Certified Data Engineer – Associate , Amazon Web Services (AWS)	Apr '26

ACHIEVEMENTS & PARTICIPATION

Sep '23
Received Academic Excellence Award for 4 consecutive years for outstanding performance and consistent high grades in all semesters.

Feb '26
Presented AI-IoT LPG monitoring research at IEEE ICEARS 2026 and received publication acceptance.

Dec '25
LangAthon 2025 – Prototype Display Phase
Developed Capto, an AI-based multilingual image captioning system with text-to-speech, deployed on Hugging Face Spaces.

Sep '24
V-MEDITHON 2024 – Participant
Built an NLP-based voice-to-text prescription prototype.

PROJECTS

AI-powered voice-to-text prescription generation , CYSCOM and NEXUS Link	Feb '24
• Built a real-time voice-to-text medical prescription system using NLP and speech recognition, reducing manual errors and improving efficiency. Tech: Python, NLP, Speech Recognition	
Gas Sentinel – AI-Powered LPG Monitoring System Link	Oct '25
• Developed a smart LPG monitoring system for weight tracking, gas leakage detection, and theft prevention with real-time alerts and dashboard. Tech: Python, IoT, Flutter, Sensors	
Multilingual image captioning Link	Dec '25
• Built a deep learning model to generate image captions in regional languages with text-to-speech support. Tech: Python, NLP, TensorFlow, Hugging Face	
Real-Time Drowsiness Detection System (Deep Learning OpenCV) Link	Feb '26
• Built a real-time drowsiness detection system using Haar Cascade + MobileNetV2 CNN with live monitoring and alert system. Tech: Python, OpenCV, TensorFlow/Keras	

SKILLS

Programming languages	Python, SQL, C, Java
Libraries & Frameworks	NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, OpenCV, MobileNetV2
AI & ML Concepts	Machine Learning, Deep Learning, NLP, CNN, RNN

Tools GitHub, VS Code, Excel, Jupyter Notebook, Google colab, Figma

Cloud Technologies AWS (EC2, S3, IAM, Data Pipelines)

Mobile Development Android Studio, Flutter

Soft skills Problem Solving, Team work, Creative thinking, Fast learner

Web Technologies: HTML, CSS, JS

Languages Tamil, English

PUBLICATIONS
